

## Tensioner Identifier Photos and Your Options:

This information only pertains to the Daimler Chrysler 2.4L engine (Model years 1995-2005) in such models as Neon, Cirrus, Breeze, Stratus, Sebring, Pt Cruiser, Voyager, Caravan.

Part # 979001 is sold as the tensioner only. Your original mounting bracket can be re-used. This will simplify the installation procedure.

**NTN Mechanical Tensioner** – Used by Chrysler only a few years and is no longer available. Notice the tensioner has a black plastic center and has a steel (powder metal) bracket. If your vehicle has this tensioner you don't have to replace the entire tensioner and bracket assembly. The tensioner **979001**, without the bracket, can be purchased through **Tendeco' distribution partners**, to replace this obsolete part. This will save time and money since complete timing cover and cam sprocket removal are not necessary.

Part # 979589 is sold as the tensioner only. Your original mounting bracket can be re-used. This will simplify the installation procedure.

**Litens Mechanical Tensioner** – Used by Chrysler in later model years to present. Notice external spring tang as well as the all aluminum bracket. . If your vehicle uses this tensioner you don't have to replace the entire tensioner and bracket assembly. The tensioner **979589**, without the bracket, can be purchased through **Tendeco' distribution partners**, to replace this obsolete part. This will save time and money since complete timing cover and cam sprocket removal are not necessary.

**Hydraulic Tensioner** – Upgrade to Litens Mechanical tensioner with bracket/tensioner assembly **978589**. This assembly is available through **Tendeco's distribution partners**.
